Summary

Full-Stack Developer with **almost 3 years** of commercial experience building production web applications in TypeScript, with a focus on **e-commerce, payments and third-party integrations**. Owns features end-to-end, from database schema and API design (**Drizzle ORM, oRPC, tRPC, Inngest**) to server-side rendered frontends (**React, Astro, TanStack**). Currently building a regulated German healthcare marketplace and working daily with a product team based in the UK, designers and QA. English: Upper-Intermediate (B2).

Professional Experience

Full-Stack Developer | *Binary Studio* 08/2025 – Present

German medical e-commerce platform (patient storefront and admin panel). Stack: TypeScript, Astro (SSR), React, TanStack Router, TanStack Query, oRPC, Drizzle ORM, MySQL (PlanetScale), Stripe, Inngest, Algolia, Sanity CMS, Vercel.

- Delivered **290+ pull requests** across ~280 tickets in a team of ~10 engineers; second-highest contributor.
- Rebuilt the **multi-step checkout**: cart price and margin sync with price-change confirmation, Stripe PaymentIntent recalculation on fee and delivery changes, live stock validation before payment, coupon expiration, and **partial refunds** reflected in invoices and Stripe.
- Integrated marketing and analytics: **TikTok Pixel and server-side Events API**, **Awin affiliate** server-to-server tracking, **Meta Pixel** with consent gating and PII stripping, **Klaviyo** events via Inngest, PostHog, cookie consent.
- Built **Algolia search** for products, pharmacies and FAQ with change-gated sync and Inngest reindex jobs.
- Implemented logistics: **same-day courier delivery**, DHL API shipments and label regeneration, order tracking, click and collect with per-pharmacy pickup addresses, SMS notifications via BulkSMS and Inngest.
- Contributed to the migration to an **external pharmacy ERP API**: new product schema and database migrations, product filtering, pharmacy selector, inventory-based pricing with margins.
- **SEO, performance and security**: hreflang via CMS, SSR fallbacks for indexing, faceted SEO pages and sitemap, SQL query optimization (indexed subquery replacing a heavy join), Content Security Policy (CSP) and security headers, role-based access control (RBAC) for the admin panel, prescription PDF rasterization.

Full-Stack Developer | *Nitrix Soft* 03/2025 – 08/2025

Language-learning platform. Stack: TypeScript, Node.js, NestJS, PostgreSQL, React, OpenAI API, Azure Speech API.

- Developed backend REST APIs with **Node.js, NestJS and PostgreSQL** with a focus on performance and reliability.
- Implemented AI features with **OpenAI API and Azure Speech API**, increasing session time by 45% and retention by 25%.
- Optimized SQL queries and indexes, reducing execution time by **60%** on datasets of 1M+ records.
- Built React frontends for major releases of AI-powered functionality.

React Developer | *Maxopen Studio* 01/2024 – 03/2025

Web3 products on the TON blockchain. Stack: TypeScript, React, Redux, TON Connect.

- Optimized API integration and data flow, reducing load time by 20% and increasing conversion by 15%.
- Developed reusable, modular React components, reducing feature development time by ~30%.
- Integrated **TON Connect** for cryptocurrency payments: 500+ daily transactions with 99.9% uptime.
- Launched a **P2P marketplace on the TON blockchain** that reached 200+ active users in the first month.
